Agenda

Intro

Impactful Presentations Guiding Principles

Tips & tricks for Impactful Presentations

Let's look at examples!

Conclusion

Question 1

What is the best way to start building a presentation?

	Copy / paste the data you wish to show in slides		Open PowerPoint
	Build your story & define presentation titles & subtitles accordingly		Write key message ideas on the slide's body

Question 1

What is the best way to start building a presentation?

	Copy / paste the data you wish to show in slides		Open PowerPoint
	Build your story & define presentation titles & subtitles accordingly		Write key message ideas on the slide's body

#1 It's about your story, not your slides

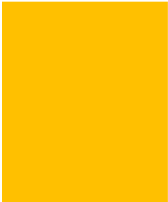

What is your objective vis-a-vis your audience?

- Design story outline to get audience from A to B before creating slides:
A: What does my audience think / know before?
B: What do I want them to think / know / do after?
- Adapt templates structure to match story outline
- Check confidentiality / legal disclaimer vis-a-vis audience

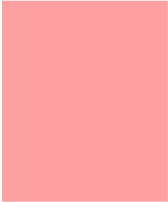

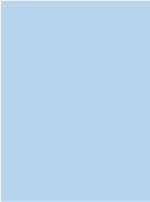

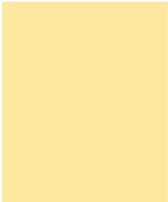

Question 2

What should be your first slide, after the title one?

	Picture of WWW Lead building an impactful presentation		Meeting agenda & timing
	Introduction of speakers		Meeting's objective & clear expectations from audience

Question 2

What should be your first slide, after the title one?

	Picture of WWW Lead building an impactful presentation		Meeting agenda
	Introduction of speakers		Meeting's objective & clear expectations from audience

#2 Trigger active listening

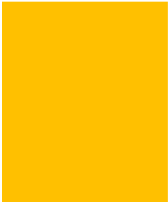

State objective & agenda on your first slides

- Is your presentation for... Alignment? Decision? Endorsement?
- Have clear ask for your audience & state on your 1st slide what you expect from them
- Schedule meeting duration accordingly: benchmark 50% time for presentation, 50% time for discussion

Question 3

A confused mind always says no. How should slides be structured?

	2 messages per slide: one in title, one in subtitle		1 message per slide: content in title, message in subtitle
	1 message per slide, in title		3 messages per slide, in the slide's body

Question 3

A confused mind always says no. How should slides be structured?

	2 messages per slide: one in title, one in subtitle		1 message per slide: content in title, message in subtitle
	1 message per slide, in title		3 messages per slide, in the slide's body

#3 Keep it simple

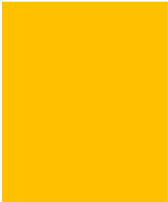

One message = one slide

- A confused mind always says “no”
- Structure slides to foster easy understanding:
 - Title:** content
 - Subtitle:** message / conclusion
 - Body:** illustrate your point

Question 4

Impactful presentation = ...?

	Detailed presentation		Exhaustive communication
	Effective communication		Long presentation

Question 4

Impactful presentation = ...?

	Detailed presentation		Exhaustive communication
	Effective communication		Long presentation

#4 Impactful Presentation = Effective Communication

Make it easy to understand what you mean

- Synthesize instead of summarize
- Prefer positive statements & direct language
- Be concise, don't lose audience in details
- Underline your point with concrete & pragmatic examples

Question 5

Which statement is not correct?

Benchmark 40 words /
slide, streamline

Write full sentences &
include connectors

Less written words
→ more visual contact
→ more impact

Limit articles &
connectors, replace “and”
by “&”

Question 5

Which statement is not correct?

	Benchmark 40 words / slide, streamline		Write full sentences & include connectors
	Less written words → more visual contact → more impact		Limit articles & connectors, replace “and” by “&”

#5 Be visual

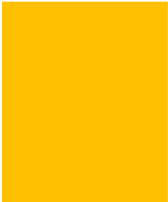

Limit & streamline text, add pictures

- Slides are not publications, they support story-telling:
 - ➡ written words
 - ➡ reading
 - ➡ visual contact
 - ➡ impact
- Benchmark 40 words per slide & streamline:
 - No full sentences
 - Limit articles & connectors
 - « and » ➡ « & »

Question 6

What is the benchmark # of slides for a presentation?

	10 slides (or less) for 30 minutes		60 slides for 30 minutes
	30 slides for 30 minutes		As many slides as you want, no rule

Question 6

What is the benchmark # of slides for a presentation?

	10 slides (or less) for 30 minutes		60 slides for 30 minutes
30 slides for 30 minutes		As many slides as you want, no rule	

#6 Maintain focus

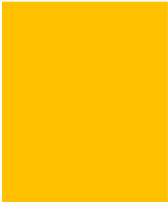

Exclude unnecessary information

- Audience can only absorb limited information at a time
- Ask yourself: is this information necessary to reach my objective?
- Benchmark 10 slides for 30 min. without Q&A

Question 7

What is the maximum # of graphs per slide?

	No maximum, you can add as many as you need		4, one in each quarter
	3 on left / middle / right sides		2, as long as they support the same message

Question 7

What is the maximum # of graphs per slide?

	No maximum, you can add as many as you need		4, one in each quarter
	3 on left / middle / right sides		2, as long as they support the same message

#7 Pick the right graph for the right idea

Maximum 2 graphs / slide as long as they support the same idea

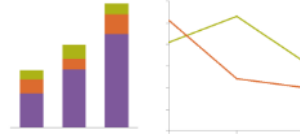

Composition

Show relative sizes of components

Time series

Highlight variations over time

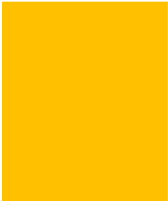

Ranking

Compare performance

Question 8

Look & feel matter too. What is the slide's standard?

	Arial font, no bold, size 14 minimum, 2 main colors. Neat & clean.		Arial, bold, underline important words & add animations.
	Calibri or times new roman, size 9 minimum. In black, sober.		Comic sans MS, rainbow style, no minimum size. Let's be craaaazyyy!

Question 8

Look & feel matter too. What is the slide's standard?

	Arial font, no bold, size 14 minimum, 2 main colors. Neat & clean.		Arial, bold, underline important words & add animations
	Calibri or times new roman, size 9 minimum. In black, sober.		Comic sans MS, rainbow style, no minimum size. Let's be craaaazyyy!

#8 Look & feel matter too

Impactful Presentation checklist

- ☐ 16/9 format
- ☐ Arial font, no bold, 2 main colors
- ☐ Size 14 min, 16 recommended
- ☐ Animations used mindfully
- ☐ Slides numbers
- ☐ Sanofi Logo bottom-left
- ☐ Presenter name on cover slide
- ☐ Acronyms known or detailed
- ☐ Auto-correct run

Bonus Question

What does the recall acronym tip STORY stand for?

Specific **T**echniques **O**f
Recording on **Y**outube

Simple **T**echnical
Outstanding **R**efreshing
You

Simple, **T**argeted,
Outstanding, **R**eadable,
You

Super **T**remendous
Operational **R**eadings in
Yammer

Bonus Question

What does the recall acronym tip STORY stand for?

	S pecific T echniques O f R ecording on Y outube		S imple T echnical O utstanding R efreshing Y ou
	S imple, T argeted, O utstanding, R eadable, Y ou		S uper T remendous O perational R eadings in Y ammer

Remember: it's about your story!

SIMPLE One message, one slide. One graph, one idea.
Relevant information only.

TARGETED Take your audience from A to B.
Clear ask on Slide#1.

OUTSTANDING To the point & concise.
Clear, direct & positive language.

READABLE Look & feel matter too:
Run impactful slides checklist.

YOU Plan, rehearse
& maintain focus.

Intro

Impactful Presentations Guiding Principles

Tips & tricks for Impactful Presentations

Let's look at examples!

Conclusion

“It’s about your story”

Tips & tricks to start a presentation

1. Clarify your objective vs. your audience
2. Define story outline / key messages:
Whiteboard / paper strongly recommended!
3. Ensure story is logical & flawless:
put yourself in shoes of audience
4. Translate outline into slides titles & subtitles & review number of slides
5. Start building your slides

“Be visual, looks & feel matter too”

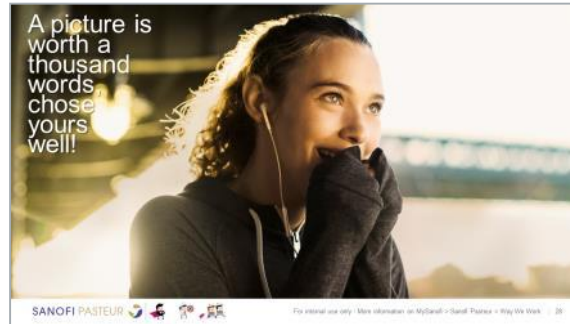

Tips & tricks to get it right

1. Once first draft done, put it aside & come back later to review it. Stand up, go for a coffee, share with peer...
2. Challenge your work: am I following Golden Rules? Review each slide in line of guiding principles.
3. Go back #1 & repeat more than once.

Impactful Presentations... Toolkit!

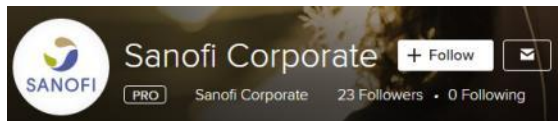

5 chapters to help you make the most out of each presentation

Quick links to icons & images databases

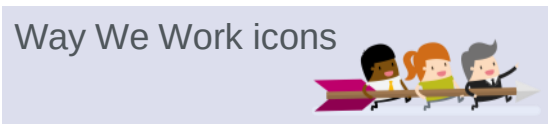

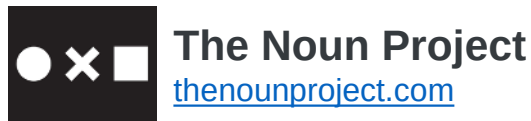

Always be mindful of copyrights

Sanofi

Sanofi Pasteur visual identity guidelines

Icons

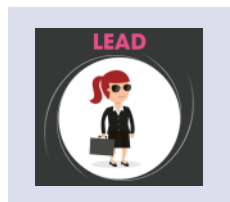

Images

Remove backgrounds for a clean effect

If the background color is unified:

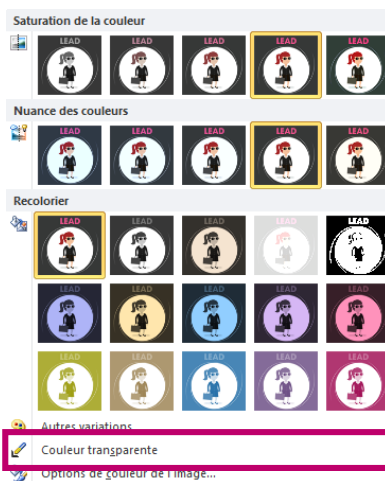

1. Select the picture & click on Image Tools > Color > Transparent color

2. Your mouse shape will change for this

3. With this pointer, click on the area that you want to remove:

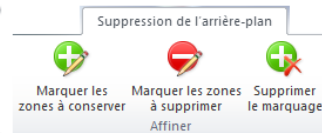

If the background is made of several colors:

1. Select the picture & click on Image Tools > Remove background

2. Select the areas to keep & the areas to remove. All areas highlighted in purple will be removed

Impactful Presentations Guiding Principles

Tips & tricks for Impactful Presentations

Let's look at examples!

Conclusion

BEFORE

Executive summary: fruits comparative study in a nutshell from context, scope, objective, findings & recommendations

BACKGROUND

- Since the **beginning of mankind**, men and women have eaten fruits.
- From oranges to bananas for the common one, to more or less a thousand of different berries, **Mother Nature has given us choice!**
- So much choice that sometimes **it is difficult & we get confused**. A confusion that triggers **fruits hesitancy**, **reducing slowly the proportion of fruits in our daily meals**

STUDY METHODOLOGY

- 5 fruits chosen for our study were selected by our **Expert in Fruit Nutritive qualities, Seasonality, Conservation and Pricing**
- Fruits were studied during 5 months by our Committee, and their observations include a **detailed analysis of their shape, size & colors**

STUDY OBJECTIVE

- By providing a detailed comparative study of 5 common fruits, **we want to help consumer choose the best one for them**
- Criteria studied are **nutrition aspects** of each fruit, the **best conditioning** for every need, the **seasonality** as well as price as it may **influence consumer choice**
- Once our comparison assessed by the population, we believe that **fruits will be progressively re-integrated in daily menus**
- Fruits chosen for comparison are **Bananas, Strawberries, Apples, Blackberries & Oranges**

FINDINGS

- Each fruit has a different « **size-shape-color combo** » hence they are easily recognizable from each other
 - For example, **bananas** are the only one in our study that are +/- 20cm long with a **lengthy shape**
 - **Oranges & apples** have a **similar shape**, however **their color distinguishes them well**
 - Despite color variations according to apple kind, none of them are orange
- Beyond taste of each fruit, we are all looking for the one(s) that will provide us the **nutritional value that we are looking for**. Each has different benefits, for example:
 - Orange and strawberries are **recommended for Vitamin C**,
 - As before an **intense activity** (such as sport) it is better to eat an **apple or a banana**
- Several fruit presentations allow the population to choose the **best fitted for their daily routine**:
 - Fresh fruit is not always the solution! Also, for them, seasonality is an important choice factor.
 - For someone who wants to keep fruit a long time in their pantry, canned are the most recommended.
 - Frozen fruits are also convenient but require a freezer.
- Finally price can highly vary between fruits, making price an additional criteria for fruit selection

RECOMMENDATIONS

- We do not recommend here any specific fruit but encourage our audience to pick them after reading this study
- As a result, they may be more satisfied from the fruit they pick & most likely to eat them again

IMPORTANT

5 FRUITS COMPARATIVE STUDY OBJECTIVE

AFTER

BACKGROUND

Fruits are healthy but under consumed

PURPOSE

Encourage fruits consumption,
all year long & for every occasion

OBJECTIVE

Provide clarity on 5 fruits to facilitate
choice based on needs

BEFORE

How to recognize your fruits Tips & tricks

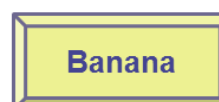

Usually round-shaped or a bit oval. Several types of apples: canadian will be grey, gold smith will be yellow, lady will be green & red

Looks a bit like red grapes but much smaller (2-3 centimeters) & probably darker. Outside looks black but the juice is redish.

No mistake here, an orange is orange and round! Sometimes the leaf is still on the orange, on top of it

Long fruit, from 10 to 20 centimeters. You can find them green in the market but they are ready to eat only when they turn yellow.

Shape is difficult to describe but a strawberry can measure from 2 to 5 centimeters for the very big ones. Usually red or green & red.

It is relatively easy to distinct these fruits from each other in the supermarket or in the market.

If you have any doubt, ask the vendor!

BEFORE

Nutritional comparison of Fresh, frozen and canned fruits and vegetables

Canned Fruits and vegetables

- They are convenient to have in your pantry for times you can't get to the store;
- They can even be kept at work for an afternoon snack.
- Since they don't expire quickly, you won't waste money when buying canned veggies
- **Watch for sodium**
 - ✓ Sodium is usually added to canned foods to preserve them. Look for low-sodium, reduced-sodium or no-salt-added labeled foods.
- **Watch for added sugar**
 - ✓ Look for fruit that's canned in water, its own juice, or light syrup (drain and rinse).
- **Delicious uses**
 - ✓ Use a blender, food processor or a fork to smash drained and rinsed garbanzo beans, northern beans, or any beans into a bean dip for baby carrots; add a little lemon juice & garlic powder for some zip.
 - ✓ Serve canned fruit as a dessert topped with low-fat, no sugar-added yogurt; or top whole grain cereal with canned fruit

Frozen Fruits and Vegetables

- These are picked at the peak of ripeness and then flash frozen to preserve optimal nutrition. They last for several months in the freezer and can be a very economical choice
- **Watch for Sodium:**
 - ✓ Compare the sodium content on the Nutrition Facts label and choose the product with the lowest amount. Sauces and seasonings can contain excess salt and add calories.
- **Watch for added sugar:**
 - ✓ Choose 100% frozen fruits without added sugars.
- **Delicious uses:**
 - ✓ When you boil pasta, throw in some frozen veggies at the end of the cooking time for added nutrients and variety.
 - ✓ Whip up a smoothie of frozen fruit, nonfat or low-fat milk and yogurt.
 - ✓ Mix frozen berries into baked goods and oatmeal.

Fresh Fruits and Vegetables

- They are easy, portable choices. Whenever you leave the house, get into the habit of stashing a fresh snack in your purse or backpack; think: apple, orange, banana, grapes or baby carrots. These snacks will keep you energized and avoid less-healthy snacks at vending machines.
- **Look for Seasonal Choices:**
 - ✓ Your heart-healthy recipes will taste even better with produce that's in season.
- **Delicious uses:**
 - ✓ Always top sandwiches with extra vegetables.
 - ✓ Serve cut-up veggies with hummus or a "light" dip for a healthy snack.
 - ✓ Serve a colorful fruit salad for dessert.
 - ✓ Add pureed fruits and veggies to sauces, smoothies, soups and more for a boost of flavor and nutrients.

Agenda

Intro

Impactful Presentations Guiding Principles

Tips & tricks for Impactful Presentations

Let's look at examples!

Conclusion

Wanted: trainers!

Leverage our self service training module

Train your teams / peers on Impactful Presentations, leveraging our self-service training module.

Available on [MySanofi](#)

All our tools are on MySanofi

Guiding principles

Get on board

I WANT TO CHANGE MY HABITS

Take our self assessment quiz and, according to your results, follow one of our personal improvement plans: Novice, Super Hero In-training or Super Hero.

I WANT TO ENGAGE MY TEAM

Organize a 1.5h onboarding workshop and follow-up a quarter after with a 1.5h progress workshop. We have prepared everything you need!

Self-service material

Collaboration tools toolkit:
Get started with our favorite collaboration tools & get better at using them!

Start your meetings with a Golden Rules minute & distribute meeting roles.

Train / get trained on Meetings & Emails via 3' training videos.

Add Way We Work Logos & Icons in your presentations.

Print our posters & Golden Rules in business cards. Find out how to best use the business cards.

THANK YOU
