

Power BI Design Updates

Author: Derek Zhu

Date: 2025-05-21

Current Data Source

1. Scorecard data is available from 20250314 ~ 20250509
 2. Historical data is only available for "Balance to Go", "Actuals", "NCOs Closed" and "NCOs Created" are still not ready
 3. Staff manpower data is available from 20240605 to 20250410 with total numbers for "In the Door" and "On the Floor", but can not link to aircraft and barge
-

Existing Data Issue

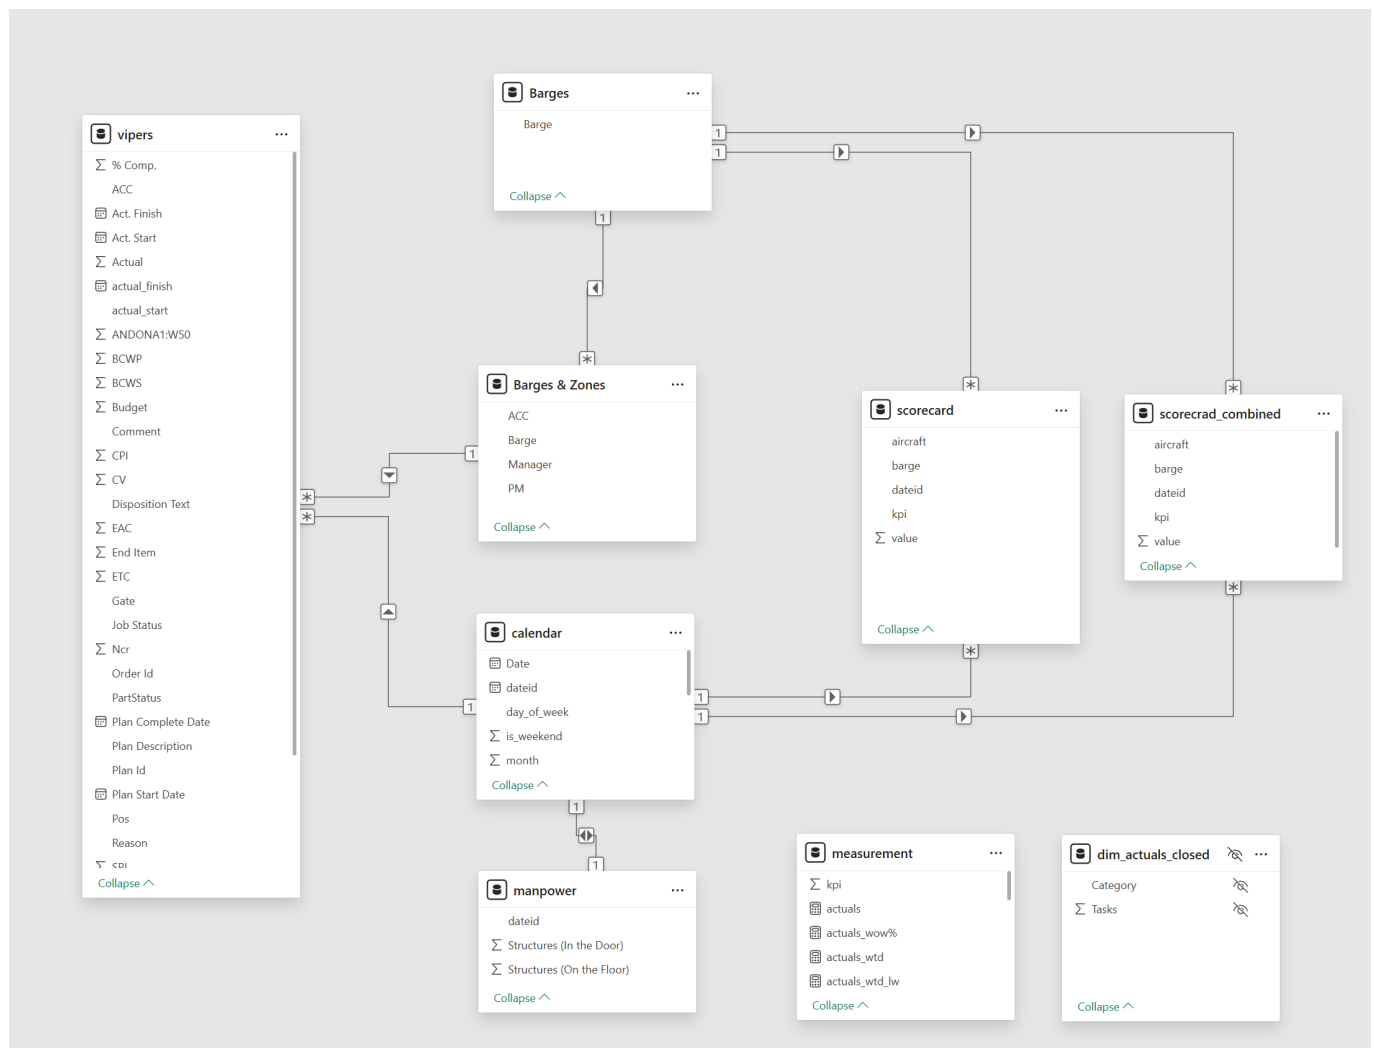

1. Combine scorecard data not consistent
 - 20250414, 20250425 valid data is from column 14 ~ 17
 - The rest data is valid from column 13 ~ 16

this issue caused combined data file could not be used until data is fixed in 20250414 and 20250425.

2. Historical manpower data have one row contains blank date
-

Data Model Updated

Data Model

1. Manpower data added
2. Combined scorecard data added

New Measures are added

1. Manpower In the Door

```
mp_in_door = CALCULATE(SUM(manpower[Structures (In the Door)]))
```

2. Manpower On the Floor

```
mp_on_floor = CALCULATE(SUM(manpower[Structures (On the Floor) ]))
```

3. Production rate% = SUM(Actual + NCO Closed) / Staff on Floor

```
production_rate% =  
var a = [actuals] + [nco_closed]
```

```
var b = [mp_on_floor]
return DIVIDE(a, b)
```

4. Combined Actual (From combine file)

```
combo_actuals =
var a = CALCULATE(sum(scorecard_combined[value]), FILTER(scorecard_combined,
scorecard_combined[kpi] = "Actuals"))
return IF(ISBLANK(a), 0, a)
```

5. NCO Age

```
NCO_Ages = DATEDIFF(vipers[Act. Start], vipers[Act. Finish], DAY)
```

Dashboard

- 1. Please provide a preferred Title for Dashboard.
- 2. Please suggest if any other visual is needed with existing measures.
